Latest Exam Guide & Learning Materials

Exam : **3V0-32.21**

Title : Advanced Design VMware
Cloud Management and
Automation

Vendor : VMware

Version : DEMO

NO.1 Which two statements are true when considering the vRealize Automation logical design for workload storage placement based on service levels, cost, and performance? (Choose two.)

- A. Storage placement is independent of vendor when using hard constraint tags
- B. Storage constraint tag is applied to virtual machine resource and all the disks associated with the template
- C. First class disks are only supported in vRealize Automation Cloud
- D. Secondary disk attached to the virtual machine resource use the same storage constraint tag as the virtual machine
- E. vSphere tags can only be used in storage profiles

Answer: B,C

NO.2 A design for a Cloud Management solution includes a section that describes the association of vRealize Operations solution with a remote collector for the purpose of gathering performance and usage metrics.

Which area of the design would contain that section?

- A. Requirements
- B. Conceptual
- C. Physical
- D. Logical

Answer: D

NO.3 As a Service Broker administrator, you have been asked to meet these requirements:

All released cloud templates must be imported to Service Broker.

Newly released cloud templates must be automatically synchronized with Service Broker.

All cloud templates must be automatically published to the service catalog.

Which two options must be configured to meet the requirements? (Choose two.)

- A. Configure content sharing using All Content option
- B. Create content source using VMware Cloud Templates option but do not configure content sharing
- C. Create content source using CloudFormation Template option
- D. Create content source using VMware Cloud Templates option
- E. Configure content sharing using Content Sources option

Answer: D,E

NO.4 A customer wants to deploy Workspace ONE Access for vRealize Suite users.

The customer wants to achieve the following requirements:

Availability SLA 95% uptime per month, calculated Monday-Friday, 24 hours per day.

The deployment footprint must be minimal.

Which design decision should the architect choose?

- A. Deploy a Workspace ONE Access cluster and protect it with Fault Tolerance.
- B. Deploy a Workspace ONE Access node and protect it with Fault Tolerance.
- C. Deploy a Workspace ONE Access node and protect it with vSphere HA.
- D. Deploy a Workspace ONE Access cluster and protect it with vSphere H

Answer: A

NO.5 An architect is designing a greenfield VMware vRealize Cloud Management solution. During the requirements gathering workshop with the customer, the future Service Owner made the following comment:

The Maximum Tolerable Downtime (MTD) for the Cloud Management solution is 1 hour.

When creating the design documentation, which design quality should be used to classify the requirements?

A. Recoverability

B. Manageability

C. Performance

D. Availability

Answer: A
