Try **PDF Demo** before you buy

## Instant Download

After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact us.

## 365 Days Free Updates

Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.

## Money Back Guarantee

Full refund if you fail the corresponding exam in 60 days after purchasing. And Free get any another product.

## Security & Privacy

We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

Latest Exam Guide & Learning Materials

**Exam** : **D-NWG-DS-00**

**Title** : Dell Networking Design

**Vendor** : EMC

**Version** : DEMO

**NO.1** Which of the following are common components of a network design template?

Response:

- A. IP addressing scheme
- B. Network topology diagram
- C. VLAN configurations
- D. Software patching schedule

**Answer:** A,B,C

**NO.2** Which tool is typically used during the scoping phase to identify and prioritize networking project requirements?

Response:

- A. PowerSwitch
- B. FastList
- C. Unisphere
- D. Control Station

**Answer:** B

**NO.3** What is the purpose of using a Post-Deployment Verification template?

Response:

- A. To define the network's initial settings
- B. To verify that the network configuration matches the design specifications
- C. To track and resolve network issues
- D. To assign VLANs to specific network devices

**Answer:** B

**NO.4** What is a key benefit of using FastScript in network automation?

Response:

- A. It reduces the need for real-time network monitoring
- B. It automatically generates and applies configurations across multiple devices
- C. It provides in-depth traffic analysis for network optimization
- D. It creates backups of network configurations

**Answer:** B

**NO.5** A network engineer is designing a leaf-spine architecture based on Dell PowerSwitches. Which three best practices should be considered in this scenario when implementing BGP?

Response:

- A. Use the same ASN for each spine.
- B. Use one ASN per each leaf pair.
- C. Use iBGP between the leaf and spine.
- D. Use eBGP between the leaf and spine.
- E. Use one different ASN for each spine.

**Answer:** B,D,E

**NO.6** Which of the following are responsibilities of a network design professional?

Response:

- A.** Identifying business requirements
- B.** Developing a security architecture
- C.** Writing software code
- D.** Providing disaster recovery options

**Answer:** A,B,D

**NO.7** What are two critical features of a Cyber Recovery vault design?

Response:

- A.** Data Domain must replicate over existing production network.
- B.** A minimum of two switches are allowed in a Cyber Recovery vault.
- C.** Firewalls are required for routing inside the vault.
- D.** Critical data is separated from the production environment.
- E.** Users cannot access vault data directly from the production environment.

**Answer:** D,E

**NO.8** In the documentation process, a \_\_\_\_\_ template is used to record any issues encountered during the network's operation and their resolution.

Response:

- A.** Troubleshooting
- B.** Pre-Deployment
- C.** VLAN Assignment
- D.** Topology Design

**Answer:** A

**NO.9** A customer environment consists of the following hardware:

- 1x MX7000 with 2x MX9116n FSE
- 4x M760c blades each with a dual port network interface controller
- 2x 32 G FC switches
- 1x FC Storage Array

What are three requirements for FCoE in this environment?

Response:

- A.** NPIV must be enabled on the Upstream Switch.
- B.** Link Layer Flow Control receive must be enabled.
- C.** A one-to-one connection must exist between the MX9116n and the upstream FC switch.
- D.** FCoE partition must be created in NPAR on the blade servers.
- E.** Zoning must be configured on the MX9116n switch.

**Answer:** A,C,D

**NO.10** Which template is used to collect the security information for a project?

Response:

- A.** ZTNA

- B. SONiC
- C. STIG
- D. NIST

**Answer:** C

**NO.11** What are two roles of the accounts team on a network project?

Response:

- A. The account technical sales representative works with the customer to prepare high-level design.
- B. An inside sales representative prepares high-level network design.
- C. Network sales representative prepares a high-level network design.
- D. The account executive is the leader of the accounts team.

**Answer:** C,D

**NO.12** Match the following scripting tools with their respective functions in network design:

Tool

FastScript

Unisphere for PowerMax

Solve Online

EPS Tool

Function

- A) Automates network configuration tasks
- B) Monitors and manages network performance
- C) Provides step-by-step guidance for maintenance
- D) Estimates power and environmental requirements

Response:

- A. FastScript - A
- B. FastScript - A
- C. FastScript - A
- D. FastScript - D

**Answer:** A
